Welcome to Progress NativeScript UI Pro
Progress NativeScript Pro UI a suite of rich-UI components targeting the NativeScript platform. The controls are based on the familiar Progress Telerik UI for Android and Progress Telerik UI for iOS suites and expose common API for utilizing these suites Android and iOS cross-platform development.
The suite offers the following components:
Calendar
Different view modes: week, month, year
Appointments support
Inline events support
Selection modes: single, multiple, range
Animated transitions between views
Styling customizations support
